

Partners

Involved in monitoring?

The EuMon consortium
comprised 16 partners
from 11 countries

-  UFZ - Centre for Environmental Research, Dept. Conservation Biology
-  Estonian Agricultural University, Institute of Zoology and Botany
-  Muséum national d'Histoire naturelle, Département Ecologie et Gestion de la Biodiversité
Université Pierre et Marie Curie, Laboratoire d'Ecologie
-  University of Durham, Department of Anthropology
-  University of Patras, Department of Biology, Plant Ecology & Ecosystems Management
-  University of Debrecen, Department of Evolutionary Zoology and Human Biology
-  Vilnius University, Institute of Ecology
Klaipeda University, Department of Recreation and Tourism
-  Dutch Butterfly Conservation, De Vlinderstichting
-  Norwegian Institute of Nature Research - NINA
-  Jagiellonian University, Institute of Environmental Sciences
-  Scientific Research Centre of Slovenian Academy of Sciences and Arts, Jovan Hadzi Institute of Biology
Slovenian Forestry Institute, Department of Forest Inventory and Spatial Information Systems
University of Ljubljana, Faculty of Arts, Department of Ethnology and Cultural Anthropology
Centre for Cartography of Fauna and Flora

We would like to
hear from you!

Project leader

UFZ – Centre for Environmental
Research Leipzig-Halle GmbH

Department of Conservation Biology,
Permoser Str. 15, 04318 Leipzig,
Germany

Klaus Henle and team
EuMon@ufz.de

Are you involved

in

**biodiversity
monitoring?**

BiMAT

The EuMon integrated Biodiversity Monitoring & Assessment Tool

<http://eumon.ckff.si>

EuMon has developed the database **DaEuMon** on monitoring schemes in Europe. The database holds **more than 600** biodiversity monitoring schemes across Europe and is publicly accessible:

<http://eumon.ckff.si/monitoring/>

You can contribute by going to the above website and enter some basic information that describes your monitoring scheme, which should not take more than a half-hour coffee break.

Dynamic reports will offer you an easy way to **seek information on monitoring across Europe** and will help you to connect with other monitoring networks.

EU-wide monitoring methods and systems of surveillance for species and habitats of Community interest

EuMon further

- **assessed** the role of volunteers in monitoring networks
- **developed** a method to determine National Responsibilities and Conservation Priorities for species
- **created BiMAT**- the EuMon Integrated Biodiversity Monitoring and Assessment Tool

<http://eumon.ckff.si/biomat/>

- **published** a range of overviews on biodiversity monitoring

Special issue on biodiversity monitoring: Biodiversity and Conservation Volume 17, No 14 (2008)
<http://www.springerlink.com/find.mpx>

Biodiversity has its own intrinsic value, but is also increasingly recognized for its goods and services.

2010 International Year of Biodiversity

Sixth Framework Programme
2002 - 2006
